

Good day team,

Thank you for sharing the update. We realize that there have not been any additional pages added. Gentle reminder that we are coming very close to the deadline date for this project, and we are still working on the same updates shared last week. Note well that all of the pages were not done to the specifications. Please find below comments:

1. Header is still not replicated to what the PDF has on it. We have resubmitted the PDF for your guidance. We have also resubmitted the logos to ensure that you are working with high resolution logo for the header since this logo looks very pixelated. It is also very small and not centred. Please see below your version vs. ours and comments as it relates to this

Your version:

What we requested:

Comments:

- Our font for banner to the top is larger
- Our chat icon is green
- To the right, next to "Vendor Log in | Register" we have the country, the language, and the currency. We see that you have put in other selections of Caribbean countries which is great but the language part is missing. Also we were not able to actually select any of these options to change it.

- Our logo is significantly larger and in the centre of the page
- Our Pages (Home, Shop Etc) are separated by a line
- Our Icons for Sign In, Wishlist, and Cart are larger so it is easy to click on it. When I hover over your icons you have now, it is not each to use.
- Our cart only has one figure in it, and it is easy to read. The figure that is in the cart will be the number of items in the cart. The value of the cart that you have is fine.
- Our search bar is centred and just a little longer than our pages.

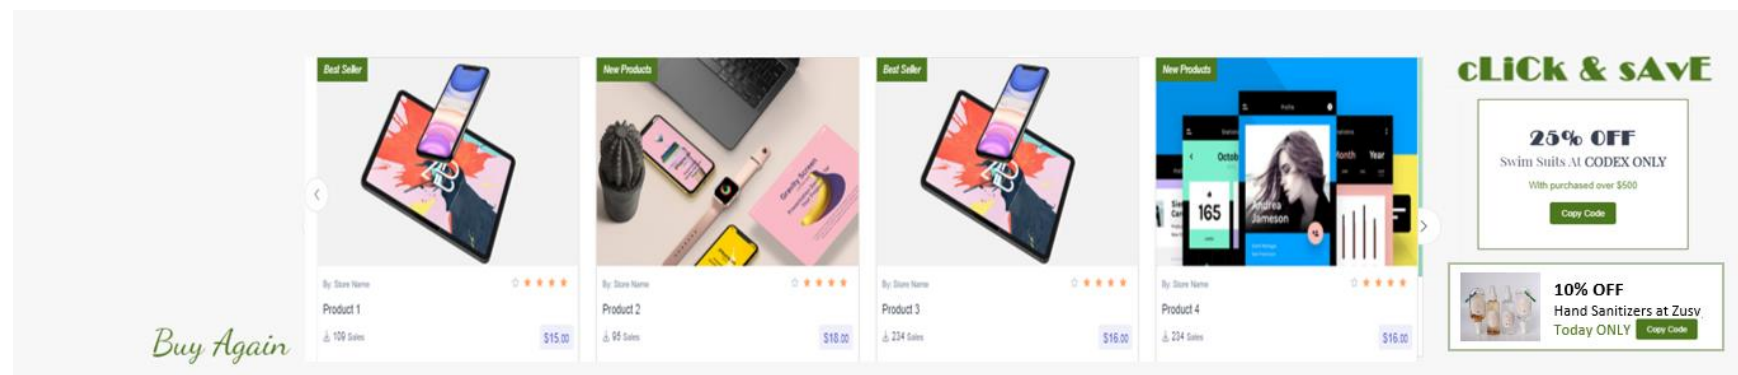

We ask again, kindly simply replicate our header. Font should not be too small to allow older persons to read. We love our header and would like to get exactly that. Our header is a snippet of our website on Wix so we know that it is possible. We did not see if the chat button pops up a chat as this option was not functional.

2. Home Page. We have seen some changes here. We are still having an issue where the product information in the view is not replicated on EVERY where a product is displays on EVERY page which should be the case. The way the sale section is displayed should be replicated EVERYWHERE there is a product.

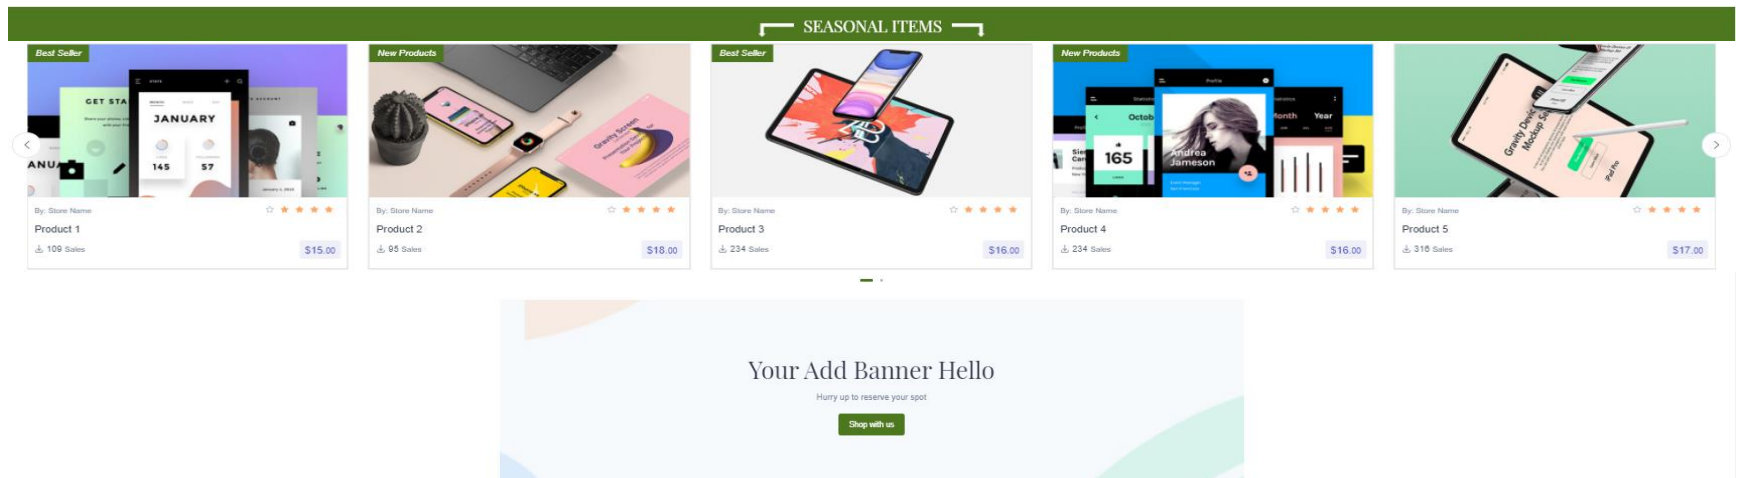

Right now if I hover over a product, there is an eye, a cart and a wishlist. I am not sure what the eye is. Instead of eye let us have Buy Now as an option instead of the eye. This is because if someone wants to see the product, they would just click it anyway. the eye does not seem very rational to us.

Also from the home page, if you click an item, it should go to the single item view and not the shop page. Going to the shop page does not make sense as they would have to find the item again. It should go directly to the single item view.

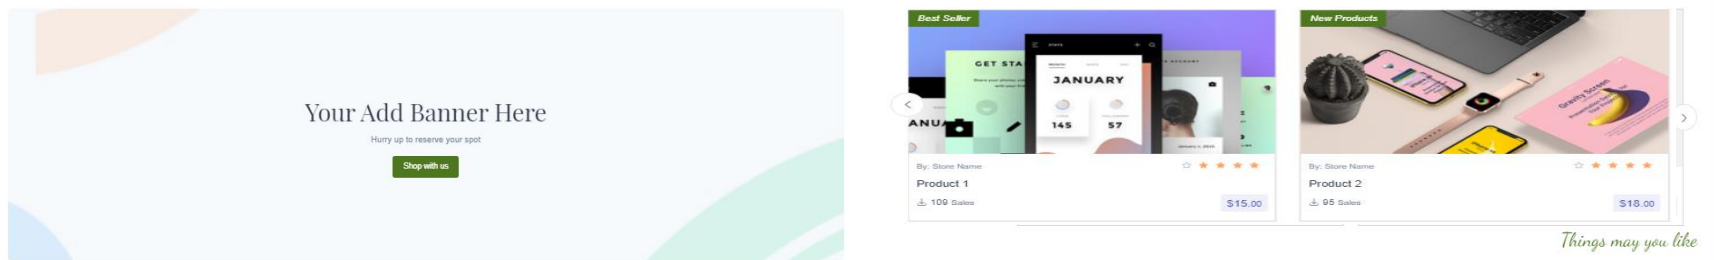

- Sale section – GOOD. Would like the product info section to have a little larger font where it is easy to ready. And would like the rating to be green please. Would like this exact format replicated on all products. All products should also have a second image or other images when you hover over the product. The exact thing should be replicated for EVERY item.
- Buy Again: Title to be placed at the bottom and get a little larger in size. Product Info should be same format as it is in SALE section

- Seasonal Items. Product info need to be in same format as it is in SALE section

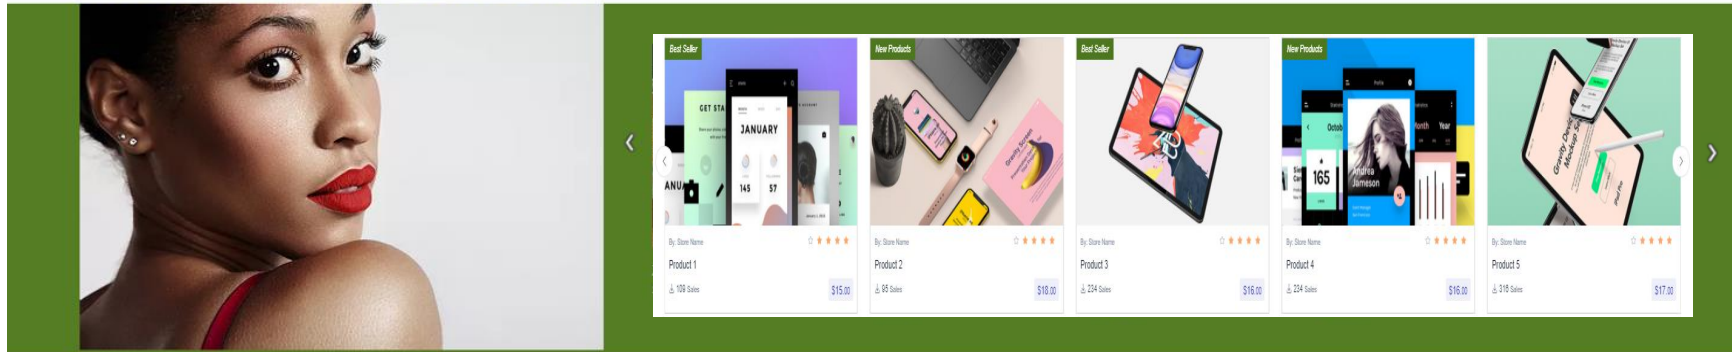

- Featured Items – good
- Things you may like: font to get a little larger and photo info need to be the same format as it is in SALE section

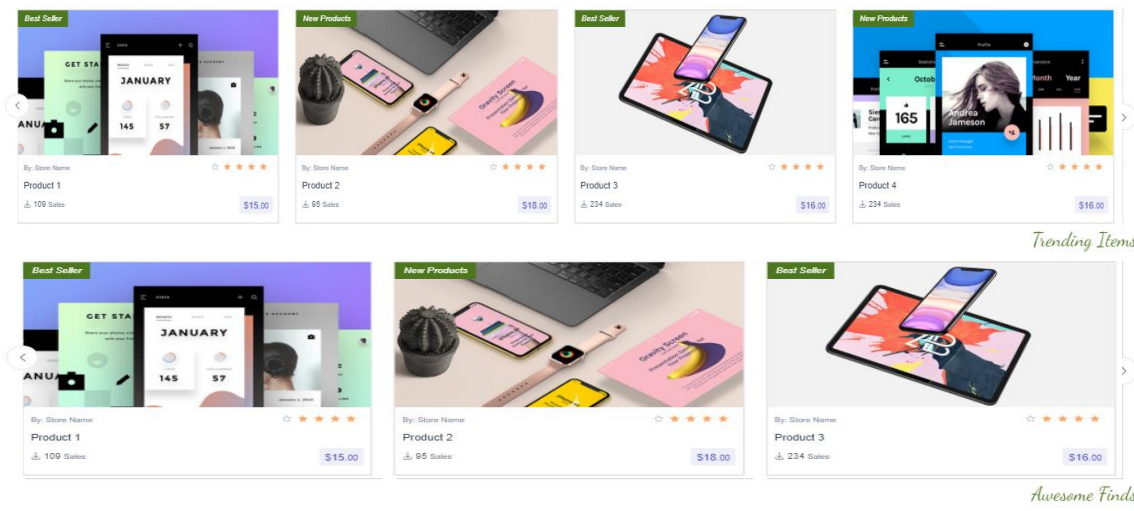

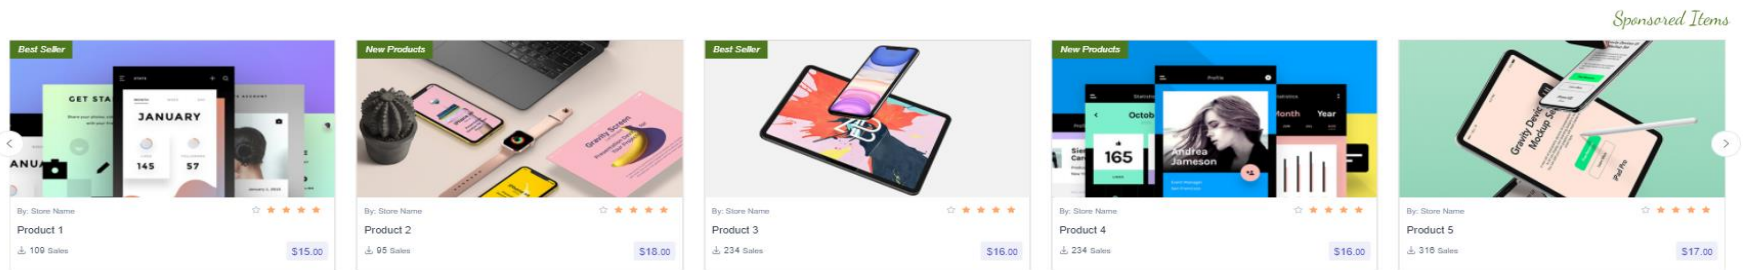

- Made in the Caribbean: Products should be the same way it will be in SALE section. Apologies that in the photo I shared previously the product detail section was transparent for some reason that was not allowing it to be easily read.

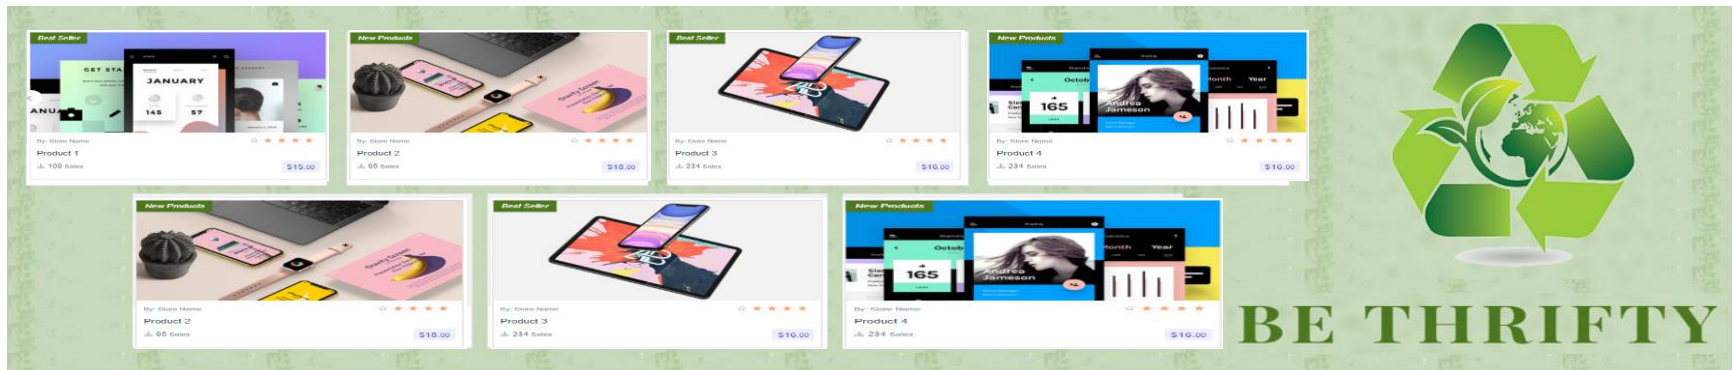

MADE IN THE CARIBBEAN

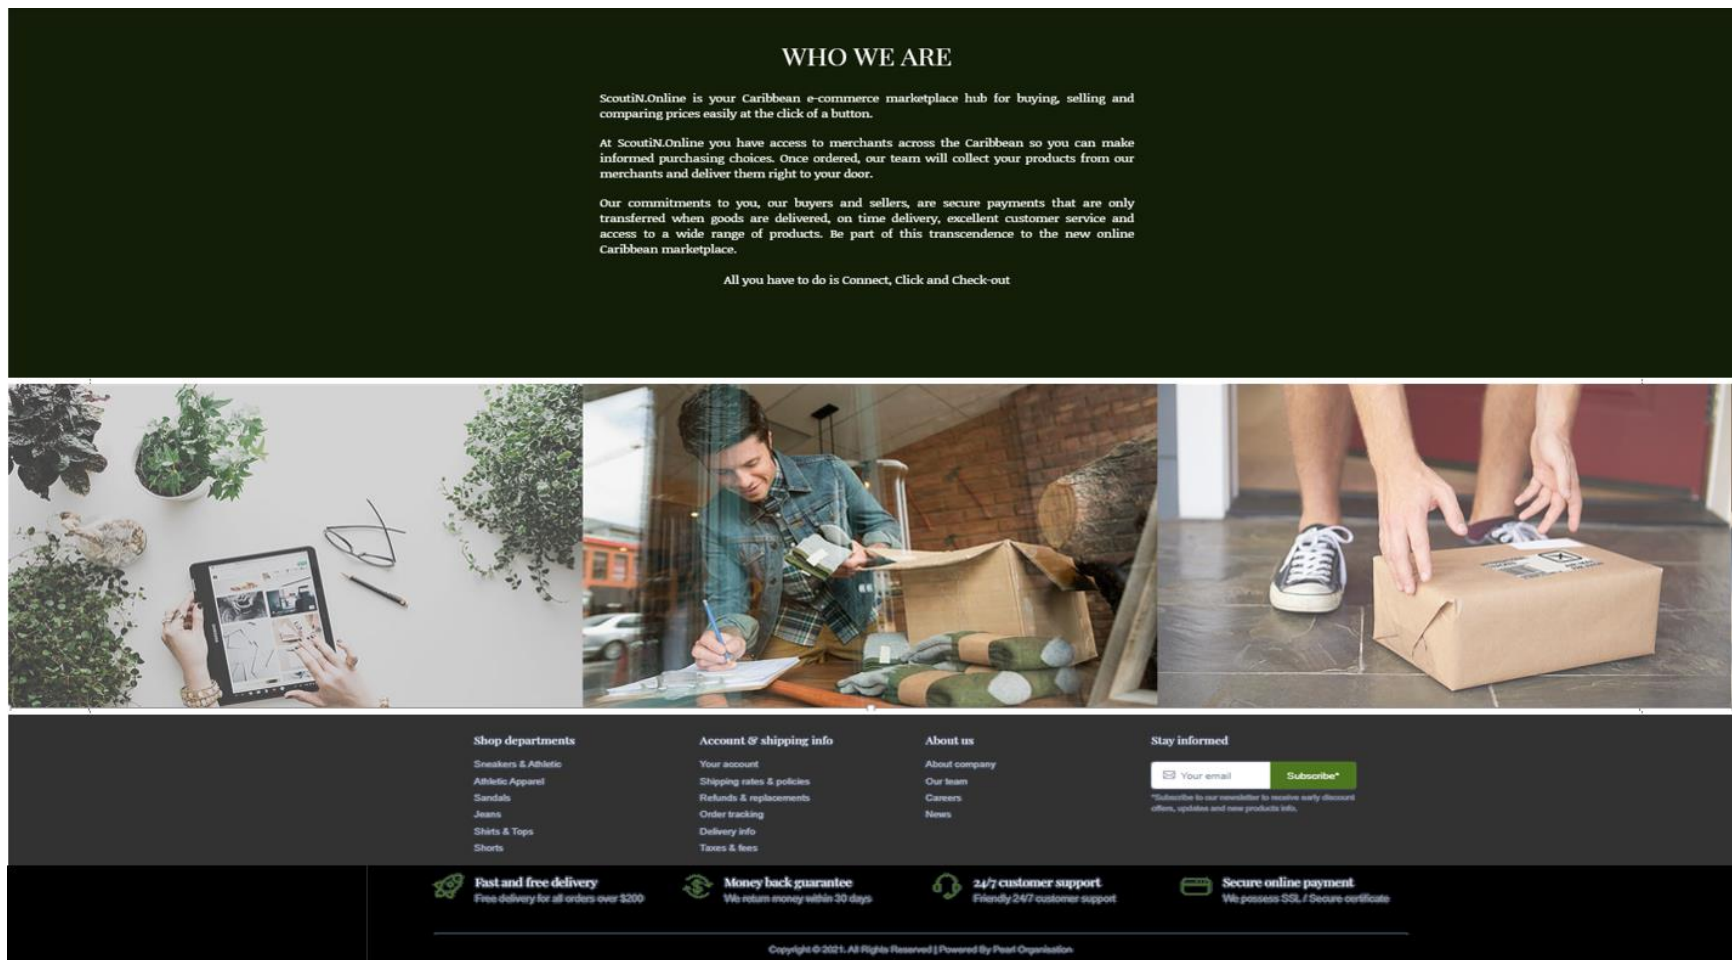

- Sponsored items Section, Trending Items Section and Awesome Finds Section – this is good however product info need to be fixed to be same as what will be done in SALE section

- Be Thrifty Section: Logo still be to larger as well as title. And product info need to be same as what will be done in SALE section

- Last Sections on home page. White Spaces still to be made between “Who are We”, Photos of packaging/Ordering etc, and Page photo. Colours of footer is still inaccurate. It should be dark grey and black, colours that were given as the swatches of colours that can be used for ScoutiN.

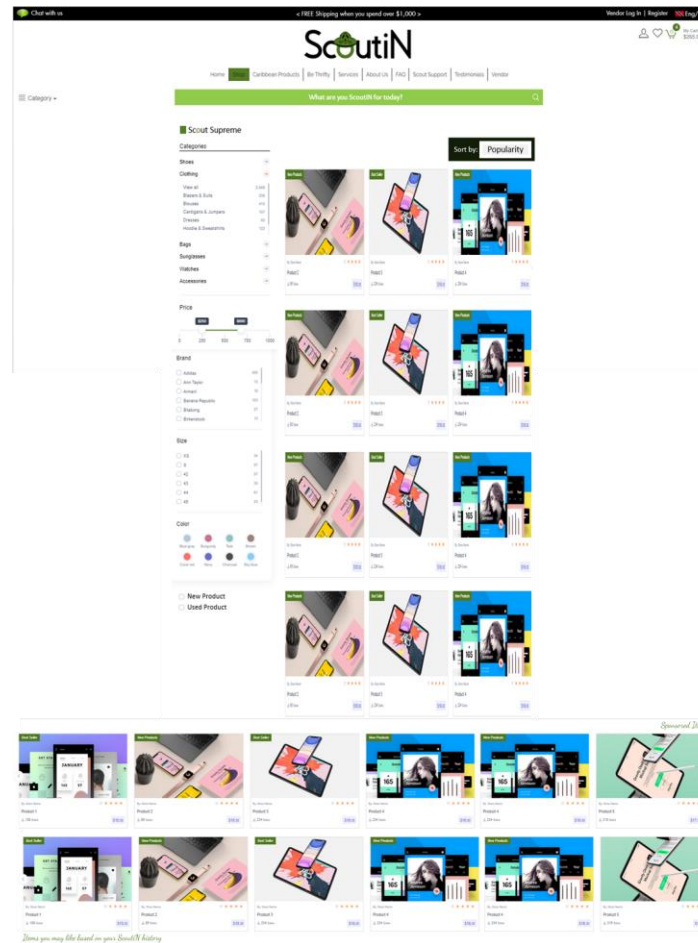

3. Shop Page

Please remove the below that is being used on the page

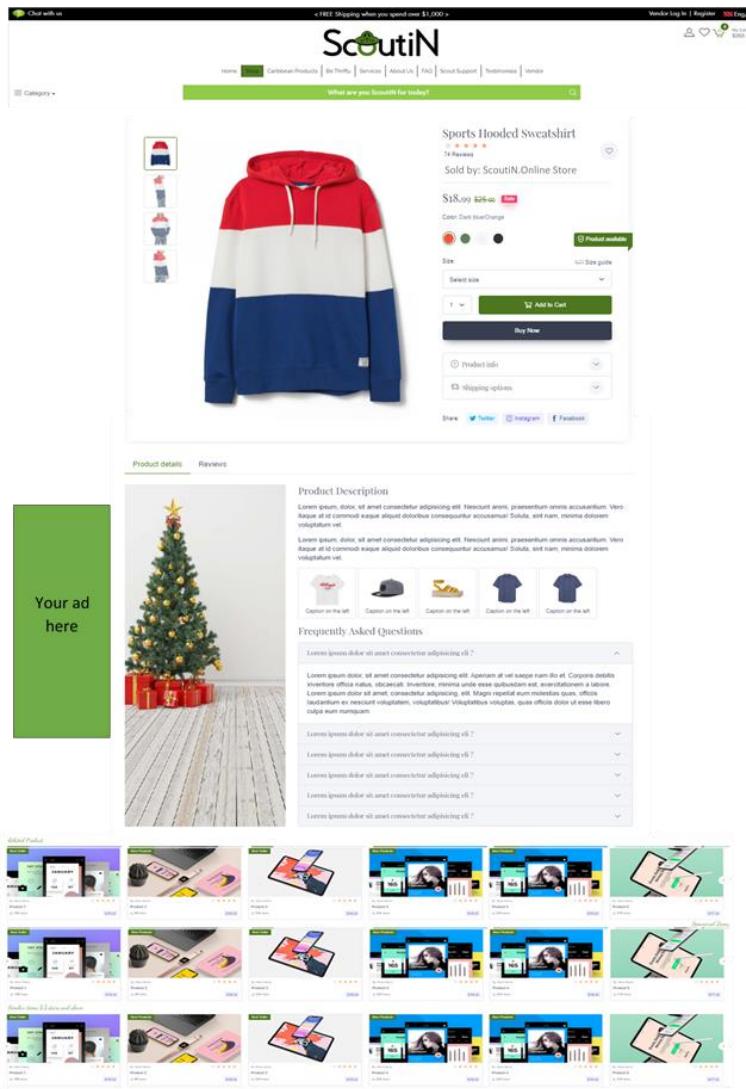

Shop page should look ONLY and exactly like the below. Note there is no banner, there is no different views for sort by.

4. Single Product view. Please remove the below banner. We do not want this banner on ANY of our pages.

See below how single product page should look. The review section is missing the option for persons to add their photos.

Review section has made some really good updates where a photo will be uploading, different ratings are allowed, however there isn't anywhere showing where the photos that persons have uploaded would go.

8. Vendor Ministore

The below is extremely different from what was requested for the Vendor Ministore. Firstly please remove this banner.

Below is the ministore that was requested.

9. Cart Page:

Please remove the banner from this page

This page is fine, however the Home page in the header, should not be in green/highlighted for this. This is the cart page, not the home page. See below what is done incorrectly. Home should not be in green unless we are on the home page.

Will be great if we can have a bar or something on this page to review the saved items that persons decided to remove from their cart but to review to purchase at another time.

We should also limit the number of items in the cart at a time. Let us limit to 50 items.

10. Checkout page

Below are what each of the items to fill out should be. Maintain the format, but change what is needed to fill out

Shipping Information:

First Name Last Name

Email Address Phone Number

Address

Street Address 1 _____

Street Address 2 _____

City _____

Country _____

Zip Code (if applicable) _____

For billing information, it is either the same as above, or the below should be the sections to fill out.

Full Name (as seen on card)

Address

Street Address 1 _____

Street Address 2 _____

City _____

Country _____

Zip Code (if applicable) _____

11. Testimonials

Please remove the below bar. We do not want this bar on any of our pages please.

We see that the rating has been included. This is great. Is there any way we can change the rating colour from yellow to green.

It seems we are still missing the overall rating section to the left. The part that is called "ScoutiN.Online Ratings by our Shoppers" this should be an overall rating from all of the testimonials that were done. Also the home page should not be selected and in green, this should be the testimonials section highlighted in green.

NEW PAGES:

Caribbean Products Page – should be similar format to requested Shop page, however would like a background that is Caribbean looking

Be Thrifty Page – should be similar format to requested Shop page, however would like a background that looks like reusing and recycling

Services Page – should be similar format to requested Shop page, instead the filters will be different. Eg. categories will be different services offered eg. Babysitting, grocery shopping, make up artist etc, hairstylist, clothing designer, home furnishings carpenter.; price will remain, instead of colour we will have availability by year, month and date; instead of size we will have location, another filter can be rating, another filter can be years of operation etc. But same look and feel as services page.

FAQ page still to be updated.

For this week update we really hope to have all pages updated to particular specifications required. New pages populated and all functionalities as this is our last week to request large updates as the project ends very soon and we would like to avoid this going beyond the promised date.
